Thank you Megan,

The policies of the Sustainable Australia Party are clear on support for bicycle paths and improvements to public amenity. Thus our answer to all the questions would be Yes.

Public safety, access to recreational facilities such as the basketball hoop, and improvements to beach areas are all important.

Our detailed policies on the Sustainable Australia Party website also emphasise the need to redefine growth to include the things people value.

We would limit excess remuneration for council officials in order to free up resources for the things the public desires.

We support community consultation that is both transparent and binding, along with limiting inappropriate and excess development.

We want to identify and end incidious corruption that hobbles the democratic process.

To achieve these goals, I encourage you to vote 1 For Karin Geiselhart of the Sustainable Australia Party.

Regards,

Dr Karin Geiselhart
candidate for Bega
